7 LINES COMPLETED -- Belgrade, Rad, 11 Oct 50

The following power lines in Macedonia have been completed this year: Ovce Polje - Sveti Nikola, Ovce Polje - "Bogoslovac" Mine, Struga - Ohrid, Titov Vales - Gradsko, Kumanovo - "Lojane" Mine, the 42-kilometer high-tension power line between Bitolj and Prilep, and the 14-kilometer Madjari-Djorce Djordje? Petkov line. The following lines are scheduled to be completed by the end of 1950: Bitolj - "Sapuncica" Power Plant, Struga - "Pesocani" Power Plant, and the "Pesocani" Power Plant - Kicevo lines, which will total 68 kilometers in length.

POWER PLANT TO OPERATE SOON -- Belgrade, Borba, 23 Oct 50

The "Kablar" Building Enterprise in Cacak soon will complete the "Sokolje" Hydroelectric Power Plant on Sokolje Creek near Rankovicevo. The turbine of the 500-kilowatt plant was built by the "Jastrebac" Metal Enterprise, while the generator was built by the "Rade Koncar" Enterprise.

POWER PLANT TO BEGIN OPERATION IN 1951 -- Belgrade, Rad., 23 Oct 50

The first turbogenerator unit of the hydroelectric power plant at Ozalj, Croatia, will begin operation at the beginning of 1951. The new power plant, which will have a capacity of 2,000 kilowatts, is a duplicate of the old power plant at Ozalj. The machinery for the new plant is being installed.

THERMAL POWER PLANT UNDER CONSTRUCTION -- Ljubljana, Slovenski Porocevalec,
20 Oct 50

A new thermal power plant is under construction in the Konjscina coal basin near Varazdin. It will produce more power than all present thermal plants in Croatia. The first turbogenerator unit, which will have a capacity of 20,000 kilowatts, will be installed in 1951.
